## Why are there two Safety Data Sheets?

Epson is providing this document to inform you that there are two different compositions of the same ink available on the market, resulting in two Safety Data Sheets for the same ink.

Epson has changed the composition of this ink to substitute a component that has been classified as hazardous while the ink with the old composition is still on the market. For this reason, there are two Safety Data Sheets for the same ink.

To determine which Safety Data Sheet applies to your product, and to ensure that you have the correct information about hazards and risk management measures, we ask that you check the best-before date indicated on the packaging of the ink cartridge. See the following for details on how to check the date.

## How to check which Safety Data Sheet you need to refer to:

	Best-before date (YYYYMM)	Revision	Page
Replacement ink cartridge	Before: 2028.02	5.0	Page 2 – 11
	In and after: 2028.02	6.0	Page 12 – 21
